

A FOUNDATION TO **BETTER HEALTH** STARTS WITH REGULAR SCREENING

HEALTH SCREENING PROGRAMMES

Health screening helps detect hidden health risks, even if you feel perfectly well and show no symptoms or signs of disease.

Early detection, followed by treatment and good management, often leads in better outcomes and a lower risk of serious complications.

At Health Enrichment Centre (HEC), we offer customisable health screening programmes tailored to meet each individual's health needs.

HEALTH ENRICHMENT CENTRE (HEC)
