# MYOPIA IN CHILDREN

The prevalence of myopia in Singapore is one of the highest in the world. Childhood myopia often develops, and may increase rapidly, during the years that the child is in Primary School. We understand the concerns and anxiety amongst parents: why is my child developing myopia and what can be done to slow it down? Is it true that there are now eye-drops that can be used to prevent my child's myopia from increasing?

Come join us for this public forum on 02 November 2024 to learn more about the causes and treatments available.

**DR FRANCINE YANG**
